📄 SUMMARY

High-school student and software developer from Turkmenistan with experience building educational Android applications and robotics systems. Creator of published apps focused on mental arithmetic, educational guidance, and Turkmen medicinal plants. Interested in using technology to improve access to education and preserve cultural knowledge. First-place winner at regional and national competitions. Also experienced in youth outreach through volunteering and educational seminars.

🏆 AWARDS

**1st Place — National Robotics
Tournament, Free Creation**
Organized by the U.S. Embassy in
Ashgabat
20/09/2026

👜 WORK EXPERIENCE

Red Crescent

Volunteer

06/2026 – Present | Balkanabat

Participated in community awareness seminars and volunteer activities. Delivered an educational seminar for 3rd-grade students during September Traffic Month, promoting road safety awareness. Helped spread safety knowledge among younger students through communication and outreach.

Berk Mebel

3d designer

12/2022 – Present | Balkanabat

Crafted high-fidelity 3D models to improve visual output for branding. Rendered complex architectural assets to assist with client proposals.

🎓 EDUCATION

High school

Secondary School No. 3 specializing in foreign languages

09/2016 – Present | Balkanabat

Advanced English

Gunbatar shapagy educational center

03/2026 – 05/2026 | Balkanabat

Computer science

Gunbatar shapagy educational center

09/2022 – 08/2025 | Balkanabat

Studied all courses of computer science in gunbatar shapagy

1st Place — Regional "Taslama" Competition

2026

Project: Medicinal Plants of Turkmenistan

SKILLS

- Java
- Android development
- Web Development
- Git
- TensorFlow Lite
- ESP32-CAM
- Arduino
- 3ds max
- Turkmen - native
- English - advanced
- Russian - intermediate

PROJECTS

Medicinal Plants of Turkmenistan

Android application, Published on Google Play

Developed an Android application providing searchable digital information about Turkmen medicinal plants.

Helped make traditional plant knowledge more accessible through mobile technology. Won first place at the regional "Taslama" competition.

<https://play.google.com/store/apps/details?id=com.medicine.kitaphana>

Auto Boom Bar

Robotics, ESP32-CAM, Android

Built a prototype automatic parking barrier using an ESP32-CAM controller and camera-based license-plate recognition. Developed an Android-side workflow for license-plate recognition and administrative vehicle-whitelist management. Designed to reduce manual work and simplify parking access. Won first place at the national Free Creation robotics tournament.

Berk Bilim

Android application, Published on Google Play

Developed an educational application featuring mental-arithmetic practice and major guidance. Used mobile technology to make educational tools accessible to students.
